End-to-End System Architecture and Automated Workflow Lifecycle

Data Flow Diagram (DFD) Specifications

This Data Flow Diagram illustrates how information moves through the Automated Network Request Management System. It shows the interaction between users, approval workflows, system processes, and database storage.

Core Elements of the DFD:

1. External Entities:

Requester (Employee): Submits network service requests through the Service Portal.

Line Manager: Reviews and approves or rejects the request.

Line Manager (Approver): Authorizes or rejects execution path changes.

2. System Processes:

- Validate Form Inputs – Verifies user information and required fields.
- Approval Workflow – Routes the request for manager approval.
- Update Database – Stores approved request details in the custom database.

Process 1.0 (Validate Form inputs): Front-end UI application checks variables and auto-populates profiles.

Process 2.0 (Orchestrate Approvals): Flow Designer executes business validation state gates.

Process 3.0 (Update Inventory Records): Commits approved values to database stores.

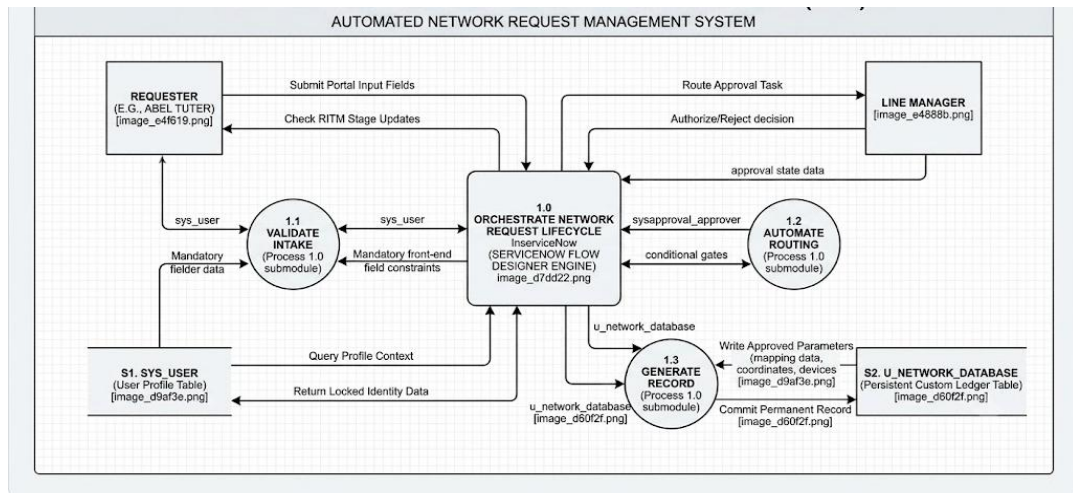

3. Data Stores:

sys_user – Stores employee profile information.

u_network_database – Stores approved network request records.

sys_user (User Table): Core source profile repository.

u_network_database (Custom Database Table): The ultimate permanent tracking schema ledger.

User Stories Table

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
 Customer/Requester Abel Tutor [cite: image_e7e69f.png]	REQUEST PORTAL INTAKE [cite: 1]					
	Automated Network Management (Epic 1)	USN-01	User Name to portal in and u_network_database	- Search deskw intranet. 1] - Does or contai in ne queue 1] - Search has stapped out below. 1]	Priority	Sprint-1
		USN-02	User Name to re-fill auto-fill	Auto-fill systemic iirements in thentification is havour. [1]	High	Sprint-1
		USN-03	User Necamme, u_network_database	Check old matidata in izienity connectie tatl instructions.	Low	Sprint-2
 Administrator/ Approver	Corporate Permtusion It [cite: 1]	USN-04	User Name / approval intranet	Request ananagement comparselilhs suppor queue [1]	Low	Sprint-2
	APPROVAL AUTOMATION [cite: 1]					
	Approval Approval Administrator/ Automation [cite: 1]	USN-05	Connext-convar claimed recont records	- Consum-grade Portal Experience - Context-Aware UI Policies - Approval ('u_network_database')	Approval	Sprint-1
		USN-06	Context-aform approval database	Confused clannied interfaces Approval automation	Low	Sprint-2
		USN-07	Connectwin network network management	- Data-ractive injection - Results in worksration request and insturted queue [1]	Low	Sprint-2
		USN-08	Is this a New connection or Relocation [cite: 1]	Instant record injection	Low	Sprint-1 Sprint-2
